CARBON

## VIRTUAL FORENSIC SUITE

## THE ONLY TOOL ABLE TO VIRTUALIZE WITHOUT IMAGING OR DISSASEMBLY!

CARBON - Virtual Forensic Suite is a revolutionary new tool which allows you to instantly virtualize any Windows computer without imaging or disassembly! There is no complicated configuration or setup required. You can literally boot a Windows computer in minutes! Additionally, CARBON handles the tasks of bypassing user logon passwords and troublesome hardware configurations. And of course we can also virtualize both common and uncommon forensic and virtual machine image types.

CARBON also includes RECON for Windows (which automatically identifies and parses Windows forensic artifacts), and a customizable advanced data carver and file search tools.

Features

• Instantly Virtualize Thousands of Windows Devices - No Imaging and No Disassembly
