

# RECON

Automated MAC Forensics

THE ONLY TOOL TO SUPPORT BOTH FORENSIC IMAGES AND LIVE RUNNING MAC!

Now anyone has the ability to analyze a Mac as an expert would, in minutes! With the click of a button, RECON for Mac OS X automatically finds important artifacts, parses the data and presents them to you in a unified format that can be refined to produce thousands of reports. RECON for Mac OS X also comes preinstalled with PALADIN PRO which provides a Full Forensic Suite to dig deeper into a Mac or any other file system (iOS, Android, Windows or Linux). Additionally, RECON for Mac OS X includes write-blockers, imagers and hundreds of additional forensic tools. RECON for Mac OS X was designed to replicate what a real expert Mac forensic examiner would do if given weeks to work on a case.

RECON for Mac OS X automates what an examiner would do in only minutes. Additionally, RECON for Mac OS X was designed to discover and parse artifacts commonly overlooked by expert examiners.

RECON for Mac OS X is the only tool to automatically create Advanced Artifact Timelines, instantly recover Keychain passwords and run on a live Mac!
